
Website Server Fixed

Posted by peterf - 2008/03/12 02:04

Hi Guys,

as you may have noticed, the website has been having problems this year. Unexplained issues with the web host in the USA has meant that we've had to remove most of the functionality from the site and wait for their server to be upgraded.

The server upgrade has finally been completed! I guess yearly renewal time must be close...

So during March I will be updating the site and restoring the functionality that was removed.

Let me know if you have any issues or suggestions.

-Peter
